

wollaston beauty clinic

After having deliberated for months, finally I decided on the task of setting up a web site. Totally inexperienced in such matters, I needed someone who was prepared to talk to me at my level of understanding.

Zena visited my premises to get a feel for the type of business I run, and after an informal chat, laid out a clear format of how things would develop within my particular web design. I felt confident, at long last, and excited about the prospect of working and developing further our ideas.

I am extremely impressed with the level of expertise and knowledge passed on to me by Scarlet Zebra. Within less than 2 months my highly professional website is at the top of the Google search engine, bringing in new business already! Zena is still there to help further and improve my site and support me, answering any queries or questions I may have.

I would highly recommend Scarlet Zebra to anyone who wants a web site to be confident with and proud of.
